

# GREEN ENERGY BUSINESS OPPORTUNITY CONFERENCE

November 15, 2010

## **Green Energy Business Opportunities Conference Set for May 3, 2011**

*Nation's Second Gathering of Veterans, Women, Minority Businesses & Skill Seekers*

Baltimore, MD –The prestigious Presidents Round Table and Maryland's Legislative Black Caucus Foundation have announced the second annual Green Energy Business Conference [GEBOC] for May 3, 2011. The diversity conference will be hosted at the newly remodeled BWI Marriott at Baltimore-Washington International Airport.

The ground breaking national diversity conference on green energy business and career opportunities provides a better understanding of the rapidly emerging Green Economy. Women, veterans, minorities and other disadvantaged business owners are offered the latest insight in business trends and government programs in energy efficiency and green energy. Small and disadvantaged businesses, major utility companies, reputable venture capital firms and like minded non-profit business advocacy organizations are again being invited to participate. Procurement and matchmaking plans are now underway.

“Major changes in energy supply and demand are underway. As a sign of how important those changes will be Maryland's state legislative Black Caucus Foundation has joined with us to help grow this conference. Minority and small businesses can make good money by better understanding the green energy economic environment, planning their business growth accordingly and identifying reputable financial partners. All of this will be at the center of our conference presentations and expo” said Stanley Tucker, Chairman of the Board of the Baltimore President's Round Table.

In addition, a dedicated track will showcase in demand careers in areas such as solar panel installation and maintenance; energy audit certifications; SMART meter installation and maintenance; wind turbine installation and maintenance; or housing insulation and retrofit training and certifications. Special outreach is underway to traditionally disadvantaged communities to increase this orientation to skills training for participation in this dynamic sector of employment.
